## “Workshop on climate change and role of waste management on climate change”

On 19<sup>th</sup> December, 2018 department of BSC.IT organized workshop on “climate change and role of waste management on climate change”. The workshop was started with introducing Mr. Shrikanth Parab to the students and then he was felicitated by Mr. Chandrakant Borle (HOD of BSc IT department).

In the opening session Mr. Parab introduced the importance of studying that topic and why we should pay attention towards it. He also explained the basic reasons which affect the climate and also explained the effects of climate change like, increase in amount of green gases, change in average temperature of atmosphere and melting of glaciers etc. He showed the pictures and video to make students aware about the amount of waste accumulated in deonar dumping ground of Mumbai. Then he also presented the problem faced by showing views of villagers who are situated near that dumping ground (like bad atmosphere in the village, unhealthy condition of villagers and more).

He advised students to do segregation of dry and wet waste, so that dry waste will directly go for the recycling process and wet waste will go for compost process and that will indirectly reduce the amount of waste added in the dumping ground.

The complete session took around two hours and at the end of session Mr. Parab made students to take pledge to reduce waste.

## Attendance Sheet

"Seminar on Climate change and role of Waste Management in Climate change"

Date:- 19/12/18
